Eng. Malak Jamil Nashwan

Frontend Web Developer | React & TypeScript

Gaza, Palestine | +970 594 762 916 | malaknashwan01@gmail.com
malak-nashwan-portfolio.netlify.app | github.com/malaknashwan01-del | linkedin.com/in/malak-nashwan-29596a343

PROFESSIONAL SUMMARY

Frontend web developer building responsive websites and web apps with React, TypeScript and Tailwind CSS. Recent work includes an 8-page dashboard with live APIs, interactive maps and Arabic/English (RTL) support, and a beauty e-commerce store with a product quiz and virtual try-on. I turn Figma designs into fast, accessible interfaces and deploy them on Netlify and Vercel. Computer & Intelligent Systems Engineering student (GPA 91.31%, graduating 2027). Available for freelance and remote web projects.

TECHNICAL SKILLS

- **Frontend:** React 19, TypeScript, JavaScript (ES6+), Vite, React Router, Tailwind CSS, TanStack Query, Zustand, HTML5, CSS3, Bootstrap, Responsive Design, Accessibility (ARIA), Localization (i18n, RTL)
- **APIs & Tools:** REST API integration, Recharts, Leaflet, Git, GitHub, Vercel, Netlify, VS Code, Figma
- **Mobile:** Flutter, Dart, building screens from Figma designs
- **AI & Data:** Python, TensorFlow/Keras, scikit-learn, Pandas, NumPy, Matplotlib, Machine Learning, CNNs, Data Visualization, Jupyter, Google Colab
- **Currently learning:** Web animation

PROJECTS

Ridgeline: Hiking Dashboard | React, TypeScript, Vite, React Router, Recharts, Leaflet, REST APIs | 2026

Live: ridgeline-malak.vercel.app | GitHub: github.com/malaknashwan01-del/ridgeline

- Built an 8-page responsive dashboard (auth, analytics, interactive maps, trip planner, activity log) with protected and code-split routes.
- Integrated live APIs (Open-Meteo weather and geocoding, OpenStreetMap) with loading and error states, plus automatic fallback between map providers.
- Implemented full Arabic/English localization with RTL layout, dark mode, metric/imperial units, and accessible components (keyboard navigation, ARIA).
- Synced an interactive elevation chart with the route map, so hovering the chart tracks the position along the trail.

AngelStore: Beauty E-commerce Website | React 19, TypeScript, Tailwind CSS, TanStack Query, Zustand, React Router | angelstore-malak.netlify.app

- Built the frontend of a beauty e-commerce store with React 19 and TypeScript, with typed models for products, orders and users.
- Fetched data from a REST API with TanStack Query (caching, loading and error states, optimistic wishlist updates), and managed the cart with Zustand persisted to localStorage.
- Built a skin-type quiz with product recommendations, a virtual shade try-on, and shop filters saved in the URL with React Router.
- Styled the store with Tailwind CSS v4 using shared brand color tokens; responsive on desktop and mobile.

AI Network Intrusion Detection | Python, TensorFlow/Keras, CNN, scikit-learn | github.com/malaknashwan01-del

- Built a CNN that classifies network traffic as normal or malicious, reaching 83% accuracy on a 1,908-sample test set with 89% precision on attack predictions.
- Preprocessed the data, tracked training and validation curves over 10 epochs to rule out overfitting, and evaluated the model with a confusion matrix.

EXPERIENCE

Flutter Developer | CodeMap 2026 Training Program, TAQAT | 2026

- Built Playvo, a football-pitch booking app for players in Gaza, in an 8-person cross-functional team (backend, React dashboard, UX/UI, Flutter), splitting tasks and sharing code through Git and GitHub.
- Implemented sign-up and login in Flutter; building the booking flow (search, map, booking, payment proof and confirmation) from Figma designs.
- Validated demand with a survey of 14 players: 93% said they would use an app to book pitches.

EDUCATION

B.Sc. in Computer & Intelligent Systems Engineering | Al-Aqsa University, Gaza

Expected graduation: 2027 | GPA: 91.31%

Languages: Arabic (native), English (professional working proficiency)

CERTIFICATIONS

- CodeMap 2026 (144 hours: software architecture, code organization), TAQAT, Nov 2026
- Claude with the Anthropic API, Anthropic, Aug 2026
- AI Fluency: Framework & Foundations and Claude Code 101, TAQAT, Aug 2026
- Front-End Development Course, 2025
